RB Plug-in and S-L-O-W InFlight

Can I get an update on the RB add-on? I understand that I am not to contact RB directly so I can not assist you in moving them along.

I installed the Gig Switch last night. Everything seems to be working nicely. Kevin and I did a little test running SAP without InFlight. SAP ran very nicely. We installed InFlight and SAP began to crawl. If I remember there was a meeting scheduled yesterday afternoon to discuss this with LSI. What came out of that meeting? Can I get an update?

On Sunday we had discussed the disk back up of SAP Data. Is there some part I need to play? If so, I need to do this before 4:00pm on 11/16 as I will be traveling and then involved in the back up set up on 11/20-21.

Thanks for your help, please call me today. People are getting anxious. If you do not catch me at me desk, please call my cell. Thank you!!!

Keith R Winn
